

GYNAECOLOGY COLUMN CHAIR ELECTRIC

Now for 215 kg patient weight!

Modern reclining chair that includes leg support, extendable leg plate, patient handle, electric backrest, neck pillow, central locking wheels, rinsing bowl, paper roll holder, hand and foot controls.

In recent years, we have developed several new products around the stylish and strong column motor from Linak, including **foot care** and **sampling chairs**. A few years ago, the first reclining chair in the series arrived.

Now comes a new version of the same chair. The new version, with its stronger lift motor, can adjust up to 215 kg patient weight. The previous chair had a 165 kg max weight.

Also new: a wireless foot control via bluetooth is now offered as an option.

A low minimum height and a high maximum height provide good adjustment options, which both help the staff to work ergonomically correctly and make it easier for the patient to get on and off.

All-welded powder-coated steel tube chassis. Leg supports, pull-out leg section, patient handles, electric backrest, neck cushion, central locking castors, rinsing bowl and paper roll holder are included, as well as hand and foot controls.

CE certification

CE-certified according to **MDR**.

How it is regulated

The new chair has three motors, adjusting both height, seat angle and backrest electrically. Wireless foot control is available as an option.

Leg support

The legrests are built on a ball joint and are therefore easy to fine-tune to the appropriate position. They are also fully adjustable in height and forward/backward on the accessory rail. The black part where you rest your legs is made of a user-friendly and easy-to-clean black integral foam. The legrests can of course be cleaned with the usual cleaning and disinfecting agents used by the healthcare system.

Patient handles

The chrome-plated patient handles are an excellent support for the patient when sitting down or standing up. They can be moved very easily along the accessory rail. Both patient handles and leg supports can also be removed completely very easily, which is a good help, for example, when a patient needs to be moved from a wheelchair or bed.

Chassis and castors

The all-welded steel chassis is powder coated in gray. The sturdy 100 mm castors are locked and released with a single push - so-called central locking. This makes the chair easy to place in the examination room and enables short emergency transports with the patient seated.

Facts

Article No: 016-5000

Dimensions

Length: 134 cm

Length including pull-out leg section: 174 cm

Width: 55 cm

Seat height: 55-95 cm

Max height at highest point when the leg section is pulled-out and the chair angle is at max: 115 cm

Backrest length: 92 cm

Backrest angle: 10-60°

Seat pad length: 39 cm

Pull-out leg section LxW: 31x44 cm

Trendelenburg angle: -22°

Weight: 97 kg

Lifting capacity: 165 kg

Rinse bowl

The stainless-steel rinsing bowl under the seat is included. Outer dimensions 34x21 cm, inner dimensions up to 30x20 cm.

Pads

With foam plastic filling covered in artificial leather. A large number of colors are available to match the room's decor, **see colors**. The frame of the backrest protects the cushion from impacts.

Motors

220-240 V / 24 V. Foot and hand control included. Available with battery backup.

Offer

We will be happy to send you a quote. The button "Add to offer basket" can be used for the articles on the website for which you want a quote. The quote, which is sent by e-mail unless otherwise stated, is completely free of charge. You don't commit to anything. When you have selected the desired products for the quote, go to "Offertkorg" where name, e-mail and customer type (county council, chain, private person) are entered. Quotations are usually sent the same day or the following weekday.
