

PODIATRY CHAIR, ELECTRIC 215 KG

Electric with 4 motors, neck cushion, hand and foot controls and central locking castors.

Strong - lifts patients up to 215 kg

The leg ulcer chair is largely based on our **foot care chair** but is particularly niched for the care of leg ulcers. Where the podiatry chair has artificial leather-covered arm and leg supports, the supports on the leg wound chair are in integral foam. The chair has separate or synchronized regulation of the leg rests.

With its four motors, it is a chair that is very easily adjusted to the perfect working position.

CE certification

CE certified according to **MDR**.

Controls

Hand and foot controls included. Both can be connected at the same time. The hand controller has separate up/down buttons for a total of six different adjustments:

- * Right leg support
- * Left leg support
- * Both leg supports at the same time
- * The height of the chair
- * The tilt of the seat
- * Height, seat tilt and leg support at the same time (practical when returning the chair from a high to a low position after treatment)

Chassis

Fully welded powder-coated steel tubular stand on centrally locked wheels, electrically adjustable, very stable construction. Legrest details in stainless steel.

Tilt function of seat

Electrically adjustable. The chair can be folded into so-called Trendelenburg position

Pads

Covered in washable and disinfectable artificial leather.

Back support

Manually adjustable with gas piston.

Leg support

Individually electrically adjustable. Length manually adjustable. Working height at the patient's heel max. approx. 130 cm. The chassis of the outer heel support is made of stainless steel to withstand extensive washing.

Facts

Article No: 010-5015-3

Length with footrests extended: 202 cm.

Length with the footrests retracted: 180 cm.

Length without footrest: 167.5 cm.

Leg support length from the front edge of the seat

cushion including foot support: 40-62 cm

Legrest length from the front edge of the seat cushion excluding footrest: 27 cm.

Width: 55 cm

Seat height: 53-93 cm.

Seat angle: 0-24°.

Backrest angle: 0-71°.

Max working height at the patient's heel: 130 cm.

Weight: 95 kg.

Max patient weight: 215 kg.

Arm rest

In black integral foam.

Clearance height

About 13 cm to the cover. 5 cm to the column motor.

Wheels

100 mm central locking wheels included. All wheels are locked/unlocked with a push.

Motors and controls

220-240 V, motors 24 V. Foot controls and a hand control are included as standard.

Tilt function of seat

Electrically adjustable.

Neck pillow

Very comfortable neck pillow included, can be adjusted up and down.

The controls

Hand and foot controls are included. In addition to controls for separate regulation of the four motors, the hand controls also have a very practical function that saves a lot of time. With a single push of a button, four motors (the chair's angle, height and both leg supports) are regulated, thereby restoring the chair quickly and easily from the highest "treatment position" downwards. The hand controls can be hung on both sides of the chair.

Side table

The side table is available in two versions, either in **stainless steel** or with **laminated board**.

Rinse tub

There is now also a **tub** that can be used as a rinsing tub, with or without a **drain/tap**.

Offer

We will be happy to send you a quote. The button "Add to offer basket" can be used for the articles on the website for which you want a quote. The quotation, which is sent by e-mail unless otherwise stated, is completely free of charge. You don't commit to anything. When you have selected the desired products for the quote, go to "Offertkorg" where name, e-mail and customer type (county council, chain, private person) are entered. Quotations are usually sent the same day or the following weekday.
