

## Sack holders

For 30, 60 and 125 litre bags

### Chassis

All-welded chromium-plated steel tubes. Equipped with a stop to prevent the lid from hitting the wall. The ring locking the bag in place has a friction brake that keeps it up when changing bags, thereby eliminating the risk of pinching fingers. The ring on which a bag is put, could also be adjusted upwards to help during cleaning and is equipped with four nibs to keep the bag firmly in place.

### Lids

In coated fabric or powder coated steel plate. Red is standard color for coated fabric, white for the steelplate lids. Other colors may be available.

The coated fabric lid closes very softly and quietly, eliminating the risk of pinching. The lid, which has a hygienic design and is easily removed for exchange or cleaning, closes firmly against the bag holder ring.

### Castors/wheels

50-100 mm, 2-4 pcs depending on model.

Left to right above: 071-3062 and 071-2002

### WITH LID AND FOOT PEDAL

#### Item

30 l, two 50 mm castors

## Laundry bag holders

### 070-3300

For 125 l bags. All-welded chromium-plated steel tubes with rubber ends. Changing the bag is carried out by pressing the springy bag holder bars together. The spring steel in the bottom of the stand keeps the bag stretched and firmly in place. 75 mm castors.

### 071-6000

Laundry bag holder for 125 l bags. All-welded chromium-plated steel tubes. The spring-steel bag holder keeps the bag firmly in place. 75 mm castors.
