

Combigyn table

Combination of gynaecology and general examination table with 2 or 3 motors.
Electrical adjustment of height and seat angle/
Trendelenburg. Manual adjustment of the backrest as standard, motor for the front backrest as option.

Chassis

All-welded chromium-plated steel tubes, powder coating as option. Very sturdy construction with four lighting points. Adjusts very low and high to help the patient on and off the table. Paper-roll holder included.

Backrests

Two backrests, both for gynaecology and general examination, adjusted by gas spring. Accessible adjustment handles.

Trendelenburg/seat section

Electrically adjustable.

Seat pad

Not as wide as the rest of the table to help give access during gynaecology examinations. Easily removable pad, practical when cleaning.

Stainless steel tray

Included, pulls out and could be removed fully.

Pads

Pads covered in artificial leather stuffed with foam plastic. Several colors available to match the room decor.

Legrests

Very sturdy and fully adjustable, in a patient-friendly design. Moveable along the seat on an accessory rail. Easy to remove which helps when transferring a patient from bed or wheelchair. Available in three designs: with removable pad, in black integral foam - the latter also in version with ball joint for full adjustment.

Patient handles

Accessories. Very sturdy, chromeplated steel. Moveable along the seat on an accessory rail. Easy to remove which helps when transferring a patient from bed or wheelchair.

Castors

Central locking 125 mm castors.

Motors

220-240 V/24 V. Battery backup available as option. Foot control is standard.
