

Ultrasound table

Electrically or hydraulically adjustable. Designed in consultation with hospital professionals for a maximum patient comfort, user-friendly and ergonomic design.

Chassis

All-welded chromium-plated steel tubes, white powder-coating as option. Very sturdy construction with four lifting points. Adjusts very low and high to facilitate when the patient sits and leaves the table. Paper-roll holder is included.

Backrest and Trendelenburg

Gas spring adjusted. Easily accessible adjustment handles.

Cut-out section

Easily folded away and attached on the back of the backrest during examination. Due to its design, the section doesn't have to be taken off of the examination table.

Back support

Option. Excellent support for the patient's back during examination. Adjustable in various positions and along the side rail.

Pads

Comfortable, artificial leather upholstery, foam plastic filling. Many different colors to match the room decor.

Castors

125 mm castors, one with directional locking function. Central locking castors available as option.

Cover/storage

The plastic cover has an integrated storage area, its design helps when cleaning.

Motor

220-240 V/24 V. Battery backup is available as option (the electric model only). Hand control is standard, foot control and/or double controls are available as option.

Hydraulic pump

Foot pedal adjusted.

011-8251 plus back support 010-8260
