

Chiropody/Podiatry chair, electric

The TARSUS Chiropody chair, designed in close consultation with very experienced Chiropodists, is a very user-friendly, ergonomic and comfortable chair. With its 4 motors, it is easily adjusted to a perfect position and therefore very flexible.

Chassis

All-welded powder coated steel tubes. Electrically height adjustable, very sturdy construction.

The chair may be placed in a horizontal position, and may therefore - with a face aperture pad as an option - also be used as an examination table, if needed.

Seat tilt

The seat is electrically tilted and the chair may be placed in Trendelenburg position.

Backrest

Manually adjustable by gas spring.

Leg & foot supports

Individually and electrically adjustable. The length is adjusted manually, while the angle is electrically and individually adjustable. Maximum height at the patient's heel: ca 130 cm.

Armrests

Very sturdy. Pad size ca 41x9 cm (LxW). The patient may very well use the armrests to get up and down from the chair if needed.

The armrests may be folded backwards, which helps if a patient needs to get on or off the chair from a bed or a wheel chair.

Motors & controls

220-240 V, motors 24 V. Both a set of foot controls and a hand control is included. A wireless hand control is optional.

The hand controls have separate controls for 6 different adjustments:

- * Left leg support
- * Right leg support
- * Both leg supports simultaneously
- * Height
- * Seat tilt
- * Height, seat tilt and both leg supports simultaneously

Item	Art no
Chiropody chair, electric	010-5000
Accessory/option
