

Vela Mammography, electric

Vela Mammography is a stable and safe patient chair with pair-locked castors.

The steering handle and the easy-rolling castors makes for a very practical chair to move around, helping the Mammography staff and patient to be examined smoothly.

The electric height adjustment makes it easy to adjust the height during examination. With its large seat and full backrest a very comfortable environment is prepared for the patient.

Castors, foot, brakes

Soft castors, pair-brake back. Mjuka hjul, parlåsta bak. The lock function helps stabilize the chair during examination and/or when getting on and off.

A brake lever is optional, with which the castors may be locked also by the patient. The easy-rolling castors and the design of the foot frees space in front of the chair, thereby enable the patient to "walk sitting".

Height adjustment

Electric

Artificial leather

The Compound artificial leather has a nice surface that doesn't feel slippery and sweaty. Black is standard, others available.

Cleaning/disinfecting

Compound fulfil all high demands for medical use, with solutions up to 70-85% alcohol and chlore disinfection (1000-1200 ppm). After disinfecting, do a cold water wipe-off.
