Portable
MASSAGE
COUCHES

MADE IN SWEDEN

All our portable couches...

- have an aluminum chassis.
- are adjustable in height, MA/TE/ZON 60-80 cm, LITE 50-60 cm. MA/TE/ZON also available in heights 50-70 and 70-90 cm for a price supplement.
- have a 10-year warranty on the chassis. Applies for normal use.
- are light-weight. Models MA and TE weigh approx. 13 kg, ZON approx. 15 kg (applies for 55 cm width). Model LITE from approximately 8.5 kg.
- have cushions covered in artificial leather with 4 cm padding (ZON 6 cm, LITE 3 cm). A range of color options.

Black coated chassis is available as option

Model MA his equipped with face aperture in the pad. MA can be supplemented with all accessories except "Extension neck rest for ZON".
Widths: 45, 50, 55, 60, 65 and 70 cm.
Length: 190 cm (95 cm folded up).

Model TE has a fully adjustable foldaway headrest which doesn't need to be removed during transports. The mouldable pillow can be moved along the headrest and the armrest is height adjustable. This facilitates a range of adjustment options for the therapist and gives the patient a great degree of reclining comfort. Like MA, TE may be supplemented with all accessories except "Extension neck rest for ZON".

Widths: 45, 50, 55, 60, 65 and 70 cm.
Length: 190 cm (80 cm folded up).

Model LITE is an ultra portable couch – weighing only approximately 8.5 kg (45 cm width) – for the therapist needing maximum mobility. Extremely low weight and slimmed dimensions makes it an ideal couch for the therapist always on the run. For maximum safety, the same solid headrest as on model TE is included, as is side supports and a bag with backpack straps. Very sturdy, no "bouncing" while working it. Standard chassis colour is grey.

Widths: 45 and 50 cm
Length: 160 cm (65 cm folded up)
Height: 50-60 cm
Option: Length extension (+20 cm)

Model ZON with the tip-up backrest gives the therapist another degree of freedom. The super solid backrest is adjustable in 7 steps, 0–48°. ZON can be supplemented with all accessories.
Widths: 60 and 70 cm.
Length: 190 cm (folded up 95 cm).
Backrest: 65 cm.

Chassis

When the Swedish national soccer team needed a solution which combined the stability and quality of the portable tarsus couch, with the easy-handling of a hydraulically or electrically adjustable couch, we designed our height adjustable chassis.

The combination of a portable Tarsus couch and our market-unique chassis gives the therapist two couches in one: the portable and the stationary. The same portable couch used in the field is easily mounted on the chassis at home, transforming the portable couch to a stationary. Height adjustment is made electrically or hydraulically depending on your preference. The chassis is adaptable with MA, TE and ZON, regardless of production year and couch width.

Chassis

All-welded enamelled steel tube chassis.

Height: Adjustable between 55-91 cm. Special heights are available for a price supplement.

Length
135 cm (142 cm including the transportation wheels).

Width
Top 42,5 cm, base columns 61,5 cm, 65 cm on the hydraulic model at its widest point (the pedals).

Not in picture: leg extension for model LITE

You are holding a brochure showing a selection of Tarsus' product range. For your information, here are some key words regarding our portable tables:

LIGHT The framework of our tables is of white enamelled aluminum.

STABLE The construction of sturdy tube dimensions and longitudinal struts makes the tables very stable. The locking rings further enhance safety.

DURABLE AND RELIABLE We regularly hear of tables from our first year of manufacture, 1989, which are still in good shape and in use. Our tables are used by tens of thousands of therapists all over the world, by everybody from home masseurs to physiotherapists for national sports teams.

ADAPTABLE The tables are very easy to erect and fold up.

USER-FRIENDLY The tables have only two pairs of legs, which give the therapist leg room under the table during treatment. The height is adjustable to facilitate correct work posture. Simple adjustment controls.

FLEXIBILITY The tables can be supplemented with a number of accessories, particularly Tarsus' electrically or hydraulically adjustable chassis, which was originally developed at the request of the Swedish national soccer team's therapists.

A few words about the people at Tarsus:

QUALITY is a matter of honour for us, which we would like to permeate the whole company. Our ambition is that you should experience this from your first contact with us on.

SERVICE-MINDED If you contact us with inquiries and requests, we will do everything possible help you swiftly.

R & D The staff at Tarsus includes both physiotherapists and masseurs, who together with leading schools and therapists develop our products.

OUR RANGE Also includes our so-called Physio couches (stationary couches that can be raised and lowered electrically or hydraulically), therapy chairs made of aluminum, table massage sets, saddle chairs, etc.

BROCHURES may be downloaded from our web-site.

Welcome to our world of treatment tables!
