

Physiotherapy tables

Designed in consultation with physiotherapy professionals for maximum patient comfort, user-friendliness and ergonomic design. **Physio I** is available with electric or hydraulic height adjustment. **Physio II** has two electric motors, one for height adjustment and one for adjustment of middle section.

Chassis

Powder coated high quality all-welded steel tubes. Stable construction. The low minimum height and high maximum height and easy adjustment possibilities, makes the table patient and user friendly and gives maximum accessibility and an ideal work level. The chassis is equipped with two front castors as standard (see the *Physio I* image).

Height adjustment

Variable adjustment with electric motor or hydraulic pump.

Frontal armrests

Adjustable armrests, easy to use, good patient comfort.

Folding side armrests

Widens the table 30 cm, easy to use. Not available for 65 and 70 cm tables.

Headrest

Adjustable both in height and horizontal position, with a soft padded cushion.

Middle section

Variably and electrically adjustable. Only model **Physio II**.

Leg section

Adjustable leg section is available as an option, variably adjustable by gas spring.

Motors

220-240 V. Available with battery backup. Foot control (24 V) as standard, hand control is an option (no extra charge).

Pads

Foam-filled pads (4 cm) covered with imitation leather, excellent comfort. A variety of colours available to match the room decor.

Storage space/cover

The white cover may be used as storage.
